Bridger-Teton National Forest is known for its abundant wildlife and immense wildlands. Much of the 3.4 million acres of public land is untouched by roads or civilization. ATV trails wind back into parts of the forest occupied mainly by elk, moose, big horn sheep, bald eagles and pronghorn antelope. ATV tours offer you the opportunity to escape the crowds of Yellowstone and experience the breathtaking beauty of the local wilderness. Each trip consists of a small group of riders guided by an experienced expert on the area.
